ENDOMETRIOSIS

AFFECTS 1 IN 10 WOMEN

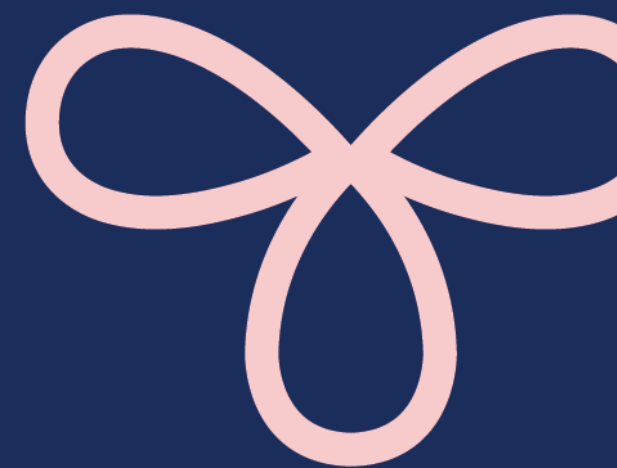

ENDOMETRIOSIS CAN BE MANAGED IF DIAGNOSED AT AN EARLY AGE AND WITH THE RIGHT HEALTH CARE TEAM

IT TAKES AN AVERAGE OF 7-10 YEARS TO BE DIAGNOSED. PERIOD PAIN IS NOT NORMAL. TALK TO YOUR DOCTOR.

PREGNANCY OR A HYSTERECTOMY WILL NOT CURE ENDOMETRIOSIS. THERE IS NO CURE.

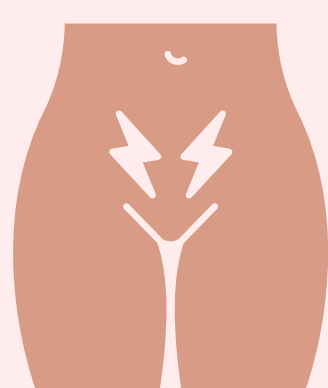

Endometriosis affects more people compared to asthma or diabetes yet it takes **7-10 years to be diagnosed.**

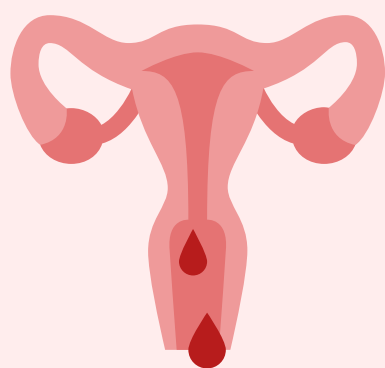

Symptoms of Endometriosis

If you or someone you know experiences any of the following symptoms, talk with your doctor about endometriosis.

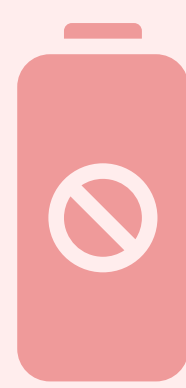

Our free downloadable Endometriosis Symptoms Checklist can be found at www.qendo.org.au
